Content

- Introduction
 - Research method
 - Results and discussion
 - Conclusion
- 
- The bottom of the slide features a decorative graphic consisting of several overlapping geometric shapes. On the left, there is a solid blue triangle pointing downwards. To its right is a larger, semi-transparent blue triangle pointing upwards. The background of the bottom half of the slide is a solid, light blue-grey color.

Introduction

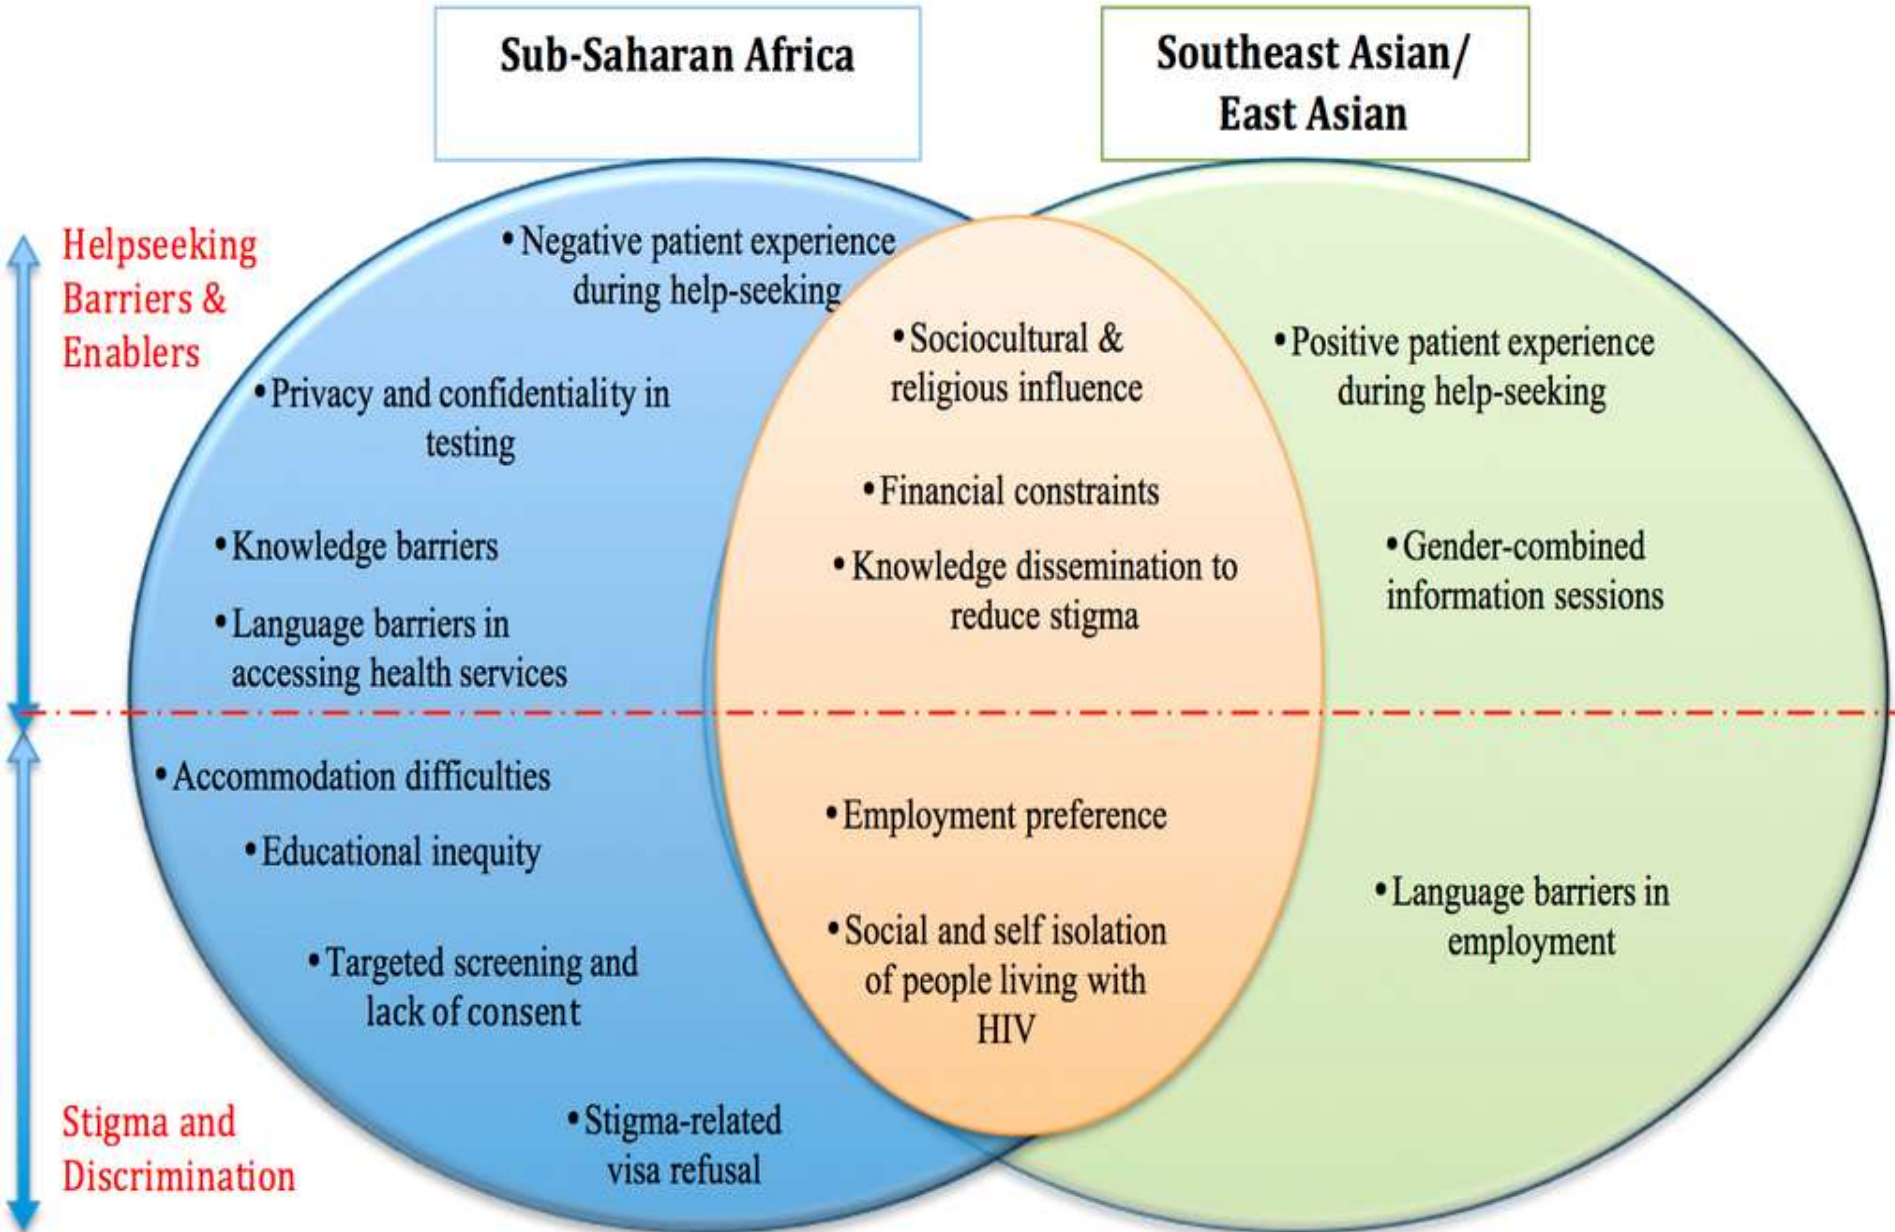

- Increased notifications of STIs among migrant groups in Australia
 - Inform best practice
 - Need for more culturally sensitive programs
 - Research Aim
- 

Research Method

Data Analysis- Modified grounded theory

Results

Results and discussion

- Some reports of involuntary screening (Targeted screening)
- Confusion regarding confidentiality and privacy standards in Perth
- Conceptualising migrants as a homogenous group and the implications on service delivery (example)
- The impact of careful wording and culturally sensitive messaging i.e. 'Migrant Health' vs. 'Migrant Sexual Health'

Conclusion

- Better understanding of migrant experiences
 - Acknowledging migrant diversity in sexual health service delivery
 - Dissemination of culturally-appropriate knowledge and information
 - Further research is needed to explore findings in greater detail
 - The findings are beneficial to policy makers as an evidence base to inform migrant sexual health-related policy implementation
- 

Thank you
